

Public Utility Commission of Texas

Project No. 42631

Workshop – 9:30 AM, July 28, 2014

1701 N. Congress Ave., Austin Texas

Video stream: <http://texasadmin.com/puct.shtml>

Agenda

Part I: Procedural Background

- ERCOT presentation – 15 minutes

Part II: Technology Overview (5-10 minutes per speaker)

- Please describe the characteristics of your facility as it relates to SSO risk.
- What are the available mitigation or protection options for your facility?
- What are the approximate material costs for the protection or mitigation options that are available for your facility?

Part III: Technical Criteria Discussion

- What is your preferred option for paragraph (c)(8) in the strawman rule? Why?
- What is your preferred option for subsection (f)? Why?

Part IV: Cost Allocation Discussion

- What is your preferred option for paragraph (g)(2)? Why?
- If costs are allocated based on “existing” versus “new” interconnections, what should the date be for this delineation?
- If generators are allocated costs and uplift is allowed, how should uplift occur?
